BLOOM PUBLIC SCHOOL

C-8 Vasant Kunj, New Delhi

SAMPLE PAPER (2026-27)

SCIENCE

CLASS VI

DATE: 01/09/26

TIME: 2.30Hr **MAX MARKS: 60**

General Instructions:

i. This question paper consists of 31 questions in 5 sections.

ii. All questions are compulsory. However, an internal choice is provided in some questions. A student is expected to attempt only one of these questions.

iii. Section A consists of 17 objective type questions carrying 1 mark each.

iv. Section B consists of 5 Very Short questions carrying 02 marks each. Answers to these questions should be in the range of 30 to 50 words.

v. Section C consists of 5 Short Answer type questions carrying 03 marks each. Answers to these questions should be in the range of 50 to 80 words.

vi. Section D consists of 2 Long Answer type questions carrying 05 marks each. Answers to these questions should be in the range of 80 to 120 words.

vii. Section E consists of 2 source-based/case-based units of assessment of 04 marks each with visub-parts

SECTION A 17

Choose the most appropriate option

1 **X** and **Y** measured their body temperature. **X** found it to be 98.6 °F and **Y** recorded 37 °C. Which of the following statements is true? 1

A. X has a higher body temperature than Y.

B. X has a lower body temperature than Y.

C. Both have normal body temperature.

D. Both are suffering from fever.

2 What happens when the south pole of one bar magnet is brought near the North pole of another bar magnet? 1

A. They attract each other.
B. They repel each other.
C. They move away.
D. No effect is observed.

3 What type of thermometer measures temperature without physical contact? 1

A. Clinical thermometer B. Laboratory thermometer
C. Infrared thermometer D. Both A. and B.

4 To measure small objects, such as the thickness of a page, the best unit of measurement would be : 1

A. Kilometer B. Meter C. Centimeter D. Millimeter

5 A student took a leaf from a mango plant and started to take its impression with the help of a pencil and a paper. The image shows the impression of a leaf. 1

What is likely to be concluded about leaf venation of the leaf?

A.Parallel venation; as the obtained design represents net-like veins.
B. Parallel venation; as the obtained design represents parallel veins.
C.Reticulate venation; as the obtained design represents net-like veins.
D.Reticulate venation; as the obtained design represents parallel veins.

6 Cone shaped and sloping branches are the features shown by the plants of 1

A. mountain region B. deserts C. coastal area D. grassland

7 A magnetic compass needle always aligns itself along which direction when brought to rest freely? 1

A. East–West
B. North–South
C. North–East
D. South–West

8 Edible mushrooms are good sources of _____. 1

A. Carbohydrates B. Fats C.Proteins D.Water

9 1.Millets are rich sources of dietary fiber (roughage) and minerals like iron and calcium. 1
2.Replacing all other nutrient groups entirely with millets guarantees a complete balanced diet because millets contain every essential nutrient in perfect proportion.
3.Consuming millets instead of refined grains promotes better digestion and sustained energy release.
Which of the above statement(s) is/are

A. 1 and 2 only B. 2 only C. 3 only · D. 1 and 3 only

10 Pihu is suffering from tooth decay and bleeding gums. Which of the following nutrients in food would help her recover? 1

A. Vitamin A and calcium B. Calcium and vitamin C
C. Vitamin C and iodine D. Iodine and Vitamin A

11 Rohan breaks a bar magnet into two pieces right down the middle. What will happen to the poles of the broken pieces? 1

A.One piece will have only a North pole, and the other will have only a South pole.
B. Both pieces will lose their magnetic properties entirely.
C. Each broken piece will form its own North pole and South pole.
D. The middle where it broke will become a new strong North pole for both pieces.

12 A carpenter accidentally drops a box of tiny steel screws into a mound of wooden sawdust. What is the fastest scientific method to separate the screws from the sawdust? 1

A. Sifting the mixture using a fine liquid filter.
B. Handpicking each screw individually out of the mound.
C. Passing a strong magnet over the mixture to attract the steel screws.
D. Blowing air with a hairdryer so the steel screws fly away.

13 What type of motion is exhibited by a pendulum? 1

A. Linear motion B. Oscillatory motion C. Circular motion D. Random motion

14 What is a magnetic compass primarily used 1

A. Measuring the weight of a magnet·

B. Finding geographical directions

C. Creating electricity

D. Heating metallic objects

15 Which of the following materials is attracted by a magnet 1

A. Iron nail· B .Nickel coin· C.Wooden ruler· D.Steel paperclip

16 The following 2 questions are assertion and reason 1

A. Assertion and reason both are correct and reason is the correct explanation for assertion.

B. Assertion and reason both are correct and reason is not correct explanation for assertion.

C. Assertion is correct but reason is wrong statement.

D. Assertion is wrong but reason is the correct statement.

Assertion (A): The children sitting on a giant wheel show a circular motion..

Reason (R): The spinning of earth on its own axis is called a circular motion.

17 **Assertion (A):** A clinical thermometer must be given a few sharp jerks before measuring a person's temperature again. 1

Reason (R): A laboratory thermometer has a kink in its stem that prevents the mercury level from falling automatically

SECTION B 10

18 List the adaptations of the cactus plant that help it to survive in the desert. 2

19 **<u>Attempt either A or B</u>** 2

A. X,Y and **Z** are the essential nutrients of our food. **X** and **Y** both provide us energy but **X** provides twice as much energy as that provided by equal amounts of **Y**. The component **Z** has no food value but it prevents constipation and helps in the normal functioning of the digestive system.

(a)Name the components **X** and one food which could provide us **X**.

(b)Name the components **Y** and one food which could provide us **Y**.

OR

19 **B.**A person lives in a hilly area. The drinking water and food grown in this area are poor in a mineral **P.** The deficiency of **P** in the body causes an abnormal enlargement of the

front of the neck leading to a disease **R**. The disease **R**, however, does not occur in the people living in coastal areas.

A.What is the name of the mineral **P**?

B.What is disease **R?**

20 Explain why a freely suspended bar magnet always comes to rest in a North–South direction. 2

21 **Attempt either A or B** 2

Give reason for the following:

A.(a) The temperature of hot water should be measured by keeping the laboratory thermometer immersed in hot water.

(b) It is not always reliable to judge a person's fever by touch.

OR

B.Draw the scale of a thermometer in which the smallest division reads 0.5°C. Draw only the portion between 10°C and 20°C.

22 A 20 cm scale has a broken end and begins from 2.5 cm. 2

A.Which mark of this scale will you use to measure the length of an object?

B.If a 12cm long pencil was measured using this scale and reading at one end is 18 cm , what will be reading at the other end?

SECTION C 15

23 Match the items in **Column A** with their correct description or unit in **Column B**: 3

Column A	**Column B**
1. SI unit of length	**(A)** Motion of the hands of a clock
2. Periodic motion	**(B)** Distance between thumb and pinky finger
3. Handspan	**(C)** Motion of a train moving along a straight track

4. Rectilinear motion	**(D)** Metre (m)
5. Circular motion	**(B)** Motion of a child on a swing
6. Oscillatory motion	**(F)** Motion of the blades of an electric fan

24 A.How does a climber plant differ from a creeper plant? Give one example of each. 3
B.What are amphibians?Explain with one example.

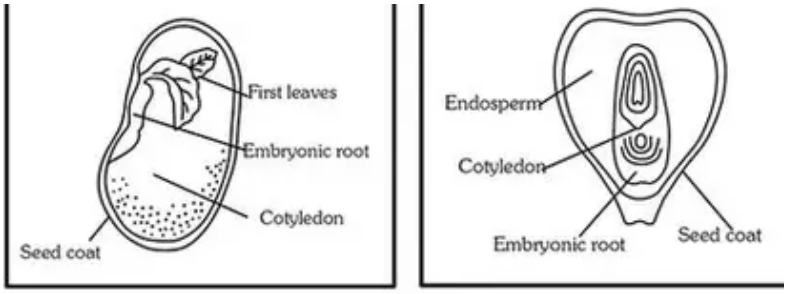

25 A.Compare using examples how cooking practices have changed over time. 3
B.How would eating local food reduce food miles?

26 How can you make your own magnet using a bar magnet and an iron strip? Describe the step-by-step process. 3

27 While measuring temperature using a thermometer, it is important to follow certain precautions to ensure accurate readings. State **three** precautions that should be taken when using a **laboratory** thermometer. 3

SECTION D **10**

28 Hema found two types of seeds while playing at home. She observed them closely and drew their diagrams in her Science Notebook. She correlated it with her science class lecture at school. 5

A **B**

A. Which type of seed has been shown in Fig.**A**?
a. Monocot b. Dicot c. Endosperm d. Cotyledon

B. Seed **B** will have_—--------_root system.

C. Which is an example of Seed **A**?
a. Beans b. Grass c. Wheat d. Rice

D. Which type of **leaf venation** is associated with Seed **B**.

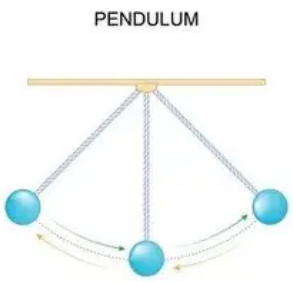

29 **Attempt either A or B** 5

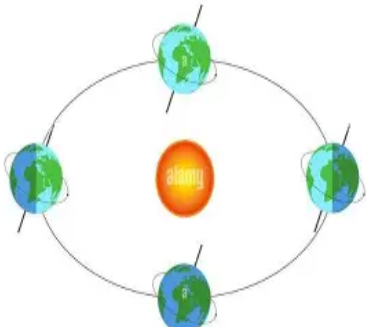

Time	Position
1.00 PM	A B X Z
1.30 PM	A B X Z

A.(a)The table shows the position of two balls **A** and **B** at different times.
According to the given observation which ball is at rest and which ball is in motion? Give reason for your answer.
(b)Raj is examining the motion of different parts of a screw. He classifies the motion of various parts of the screw as
(i) rectilinear motion,
(ii) circular motion, and
(iii) both rectilinear as well as circular motion.
Can you list one part of the screw for each type of motion? Justify your answer with reasons.

OR

29

B.(a) What is the similarity between the motion of the pendulum and the rotation of Earth around the Sun?(1)
(b)Explain why cubit cannot be used as a standard unit of length?(1)
(c)How can we measure the length of a curved line?(2)
(d)What is the correct position of the eye while reading the scale?(1)

SECTION E **8**

30 4

Read the short story below and answer the questions that follow.

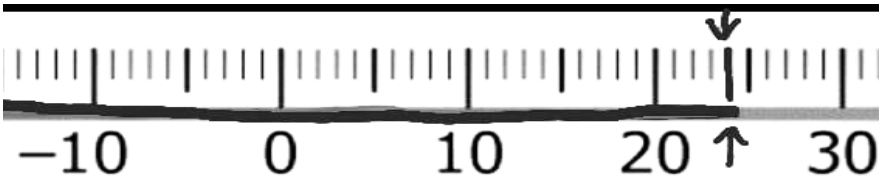

Rohan comes back from school feeling exhausted. As soon as he gets home, he fills a large plate with lunch, turns on his favorite cartoon show on TV, and sits on the couch. Eating quickly while watching TV, he finishes his entire plate in under five minutes.

A short while later, Rohan complains to his mother that his stomach feels uncomfortably full and heavy, yet he barely remembers what his food actually tasted like. His mother gently explains to him that he was eating mindlessly, and suggests that he try mindful eating starting tomorrow.

Identify two habits in Rohan's routine that show he was eating mindlessly. For each habit, explain briefly how it negatively affected his eating experience or health.

31 **Attempt either A or B.** 4

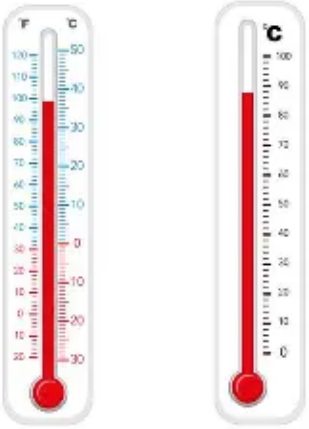

A.Based on the image of the thermometer answer the following questions:

(a)What type of thermometer is depicted in the image? Justify your answer.
(b)What is the temperature reading shown on the thermometer?
(c)What is the least count of this thermometer?
(d)Can we measure human body temperature with this thermometer? Give a reason.

OR

31 A B

B.Observe thermometer A and B

(a)What is the smallest value(least count) that thermometer A can measure?
(b)What is the smallest value(least count) that thermometer B can measure?
(c)Draw thermometer A with a red column indicating temperature 14 ℃.
(d) Which thermometer can display a temperature of 7°C? Identify the thermometer and draw it showing 17°C.

****
